Foreword

We take pleasure in sending you our 12th Annual Catalog. It is mailed to all customers who have placed orders with us during the past three years.

To those who are receiving our catalog for the first time, we extend a most cordial invitation to pay us a visit. If that is not possible, we hope that you will give us a trial order. We are proud of the top quality rhizomes which we produce and feel certain that you will be more than pleased with the way they will grow and bloom. Pennsylvania "weather tempered" iris are remarkably resistant to rhizome rot and customers continually report amazing results in the high percentage of bloom from first year plantings.

To our old customers and friends we wish to extend greetings at this time as well as express our thanks for your many nice letters and your most valued patronage. We are looking forward to seeing or hearing from you again this spring.

We will continue to pledge prompt acknowledgment of all orders and give personal supervision to the careful selection and packing of every iris shipped. We want you to be well pleased.

You Are Cordially Invited to Pay Us a Visit

The garden gate is always open from early morning to dusk every day, including Sundays, during the blooming season. So if you live within driving distance, by all means pay us a visit—you will see a display of Iris, as well as perennials, peonies, flowering trees and shrubs in bloom which will make it very much worth the trip. Colored pictures and written descriptions are poor substitutes for actually seeing a clump of Iris in full bloom—only then can its beauty, charm and grace be fully appreciated.

The Blooming Period

At our location the early varieties commence blooming usually the middle of May and the late varieties finish blooming by mid-June. The BEST TIME to visit the gardens in order to see the most Iris in bloom is from May 20th to June 10th—the PEAK BLOOM period from May 28th to June 3rd. We are always about six days behind the Philadelphia area. The dates given are for a normal spring and we suggest that if you are in doubt, telephone us before coming — Tel. Springtown - Fieldbrook 6-7836.

Location

Our gardens are located one half mile west of Route 212 in upper Bucks County at Pleasant Valley; watch for the turn at the north end of the village. Our sign posts will guide you when nearing Pleasant Valley. See our new map showing the best routes and distances on Page 35.

Terms

Cash with order please—making checks or money orders payable to Cherry Hill Iris Gardens. Sorry, no C.O.D. shipments. We have no minimum but since postal charges are now so very high, we must ask that on all orders under \$4.00, customers include 50¢ additional to cover postage and packing charges. ALL other orders are shipped postpaid.

PLEASE NOTE *If You Visit Our Gardens During The Blooming Season, And We Hope That You Will, Kindly Bring This Catalog With You When You Come.*

Shipments

We will commence filling orders this year on July 10th and continue until October 15th. Please do not request shipment at any other time.

Proper Planting Time

This depends somewhat on location. For this latitude July to mid-September gives the best results, while further north July and August are recommended. For southern states, planting may be done as late as mid-October. The idea is to plant iris early enough so that they may be well rooted before winter sets in—this prevents winter and early spring heaving. Heaving does not kill iris but it will greatly lessen the chances of blooming the first year. Complete cultural instructions are enclosed in each shipment.

Guarantee

Every rhizome will be freshly dug, large, vigorous and well rooted. They will be free from disease and insect pests and packed with greatest of care so as to reach you in perfect condition. Every rhizome is labeled with a copper wired printed wooden label true to name. No substitutions are made unless you so indicate on your order blank. (We might add here that customers who permit substitutions are **always** the gainers.)

We will replace free any Iris that does not meet with your approval or does not grow after planting providing this is reported before October 15th. (Please do not ask us to replace Iris lost by winter-kill. We do not feel that we should be held responsible for the planting location, care or for growing conditions beyond our control.) In the event there is an error in labeling, mistake will be rectified with a double replacement the following season on report from you immediately after the blooming season.

Our gardens are licensed and inspected by the Penna. Dept. of Agriculture. All shipments to areas outside the Jap. Beetle Zone are inspected and stamped by the U. S. Dept. of Agriculture here at our gardens before shipment.

The Dykes Metal Winner for 1953. A gigantic flower of an unusual color pattern. The heart of the flower is bright yellow, shading off to almost white at the top of the standards and the bottom of the falls. Entire flower is ruffled with lace-like edges, as in Chantilly. A most spectacular flower. A.M. 1951. The No. 1 Iris on the Popularity Poll 1956. **\$4.00** each

VALGANZA (Brenan '53) M. 38"

A new color variegata with yellow standards and reddish purple falls. Very striking.

\$5.00 each

VANITY FAIR (Hall, '51) V.L. 36"

Clear medium true pink, smooth and tailored in appearance. Lots of color, beautiful form, good height and a very fiery tangerine beard. Since most of all the Flamingo-pinks are finished blooming rather early in the season, this one is special interest being a very late bloomer. Gives a most creditable performance during rainy, windy weather. H.M. 1952.

\$3.00 each

VICTORIAN VEIL (Craig, '50) M. 44"

Huge blossoms of snow white ground color very heavily sprayed with rose-violet, giving a bi-tone effect. Beautifully ruffled broad petals.

\$1.50 each

VIOLET HARMONY (Lowry, '52) M. 40"

This very handsome Iris received the highest of praise at the 1953 A.I.S. Convention and was awarded the President's Cup. It is a large, ruffled flower of firm texture—almost a violet self, except for lighter flush at the haft. Blooms over a long period and has wonderful weather resistant qualities. A top quality Iris of great charm. A.M. 1954. See Inside Front Cover.

\$5.00 each

***VIOLET HILLS (DeForest, '56) M. 40"**

Fred DeForest's top introduction for 1956. A very large self of glistening Fluorite Violet with blue tipped beard. Much deeper in color and quite different from First Violet which won the Dykes Medal this past year. A clean, clear color with no haft markings. Perfect branching, excellent substance. Booking orders for 1958 at \$30.00 each. None for sale this season.

WATERLILY (Kleinsorge, '53) M. 34"

A new Iris which is different in form and color. An ivory-buff with flat falls and closed but crinkled standards. General color effect is light toned chamois skin, sprinkled with gold particles. Faint lavender cast in center of falls. Charming.

\$5.00 each

***WATERMELON (Waters, 1954) M. 38"**

Named because it is the color of the inside of a watermelon that is not quite ripe. Color is a blend of greenish light lemon and deep watermelon pink. A large ruffled flower of extra heavy substance.

\$12.00

WEDDING BOUQUET (Buttrick, '52) M. 35"

There are many good whites but here is a new one which is extra good and quite distinctive. Caught every one's attention at the '53 National Convention and was Runner-Up for the President's Cup. Pure white, heavily ruffled flowers broad, full petaled semi-flaring falls, fine well domed standards. Buds are pale chartreuse. Flowers well spaced on excellent branching. H.M. 1952.

\$6.00

WHITE PARCHMENT (H.F. Hall, '49) M.L. 40"

Has the substance of heavy parchment. White with a flush of yellow around the pale yellow beard. Closed standards and flaring falls. One of the latest whites to bloom. Tall and sturdy.

Absolutely the tallest, and one of the largest and whitest white Irises on the market today. Although large, it has good form with broad falls of firm substance and fine texture. Gold beard and haft. Blooms well spaced on the tall stalks. A majestic Iris which is very well named.

\$1.50 each

WISSINOMING (Dolman, '53) M. 38"

A tailored, lavender-blue self of very clear tone. Tall with fine branching. One of the most floriferous Iris we grow, with as many as ten blooms to a stalk.

IRIS FOR EVERY GARDEN

By Sydney B. Mitchell

The most up-to-date and complete book on Iris ever written with all basic information for amateurs and for specialists, an authentic discussion of species and varieties all over the world. With this book as guide you can select Irises to bloom from 3 to 12 months a year depending on where you live and what you plant—familiar bearded, the Japanese, Siberian, Louisiana types, or certain rare and fascinating species. Dr. Mitchell has grown Iris for 50 years, has himself developed new varieties, and shows you the way to special satisfaction with this "finest hardy perennial."

GRAY'S IRIS BORER ERADICATOR

Endorsed and used by leading Iris Growers

This solution is easily applied by spraying the Iris leaves — two applications during the growing season, means "sure death" to the borer. First application should be made early in the spring just after the Iris has started growth. Not expensive as two tablespoonsful makes one quart of spray. One quart makes 8¼ gallons of spray mixture. Complete directions are on label.

PERMARKERS

PERmanent MARKers For Plants

PERMARKERS, the new garden marker, meets **all** the exacting labeling requirements of discriminating gardeners and growers. They were designed after years of research and after testing all ordinary labels now on the market. We have used them for the past eight years.

The label is made of gray-green durable thick plastic. This label is most harmonizing in the garden. A special waterproof pencil is used. Writing remains legible for years but can be easily erased for re-use.

The supports are made of Bethanised steel which is light, rigid, durable and non-corrosive. They will not turn or heave and hold the labels firmly at a readable angle—never spattered and always clean. Labels easily removed from supports.

Postpaid prices are as follows:		Complete	Labels only

EVERY GARDEN SHOULD HAVE SOME IRIS PLANTINGS

Bearded Iris are considered the ideal perennial. They are very hardy, quite easy to grow and practically free from diseases and insect pests.

The basic needs for best results are drainage, sun and a moderate amount of feeding. Iris cannot stand wet ground or standing water for a long period without rotting—hence a slight slope or raised beds are desirable. They may be planted in full sun or partial shade but in order to bloom well there should be at least a half a day of sun. Bone meal is the safest food and should be worked in the ground around the plants early in the spring. Super phosphate is quicker acting—should be kept away from rhizomes however. Well rotted cow manure is very good if worked into the ground well **before** planting and kept away from the rhizomes.

Iris are not particular about the soil—of course a light, well drained fertile garden soil is best but they will grow in sandy or clay soil. We have them growing equally well in slightly alkaline and slightly acid soil.

The range in color is more extensive than in any other flower and with the various blends, bi-colors, plicatas and variegatas, the variety to choose from is almost unlimited.

Iris not only give wonderful color value and added beauty to your garden, but are excellent as cut flowers for the house. A stalk, if cut when the top flower is opening, will last a week or longer.

IRIS AS A GIFT

If you have a friend, relative or good business customer interested in flower gardening, you would make them very happy by sending one of our numerous special Iris Collections as a gift. Donor's card will be enclosed with the shipment—either, one you send (no writing however except your signature on account of postal regulations) or one supplied by us showing your name. Each year more and more of these growing and lasting gifts are ordered by our customers. If a special date of delivery is desired, it is necessary to order at least two weeks in advance.

GUEST IRIS DISPLAY

Last year we set aside a special space in our display gardens for guest iris. New varieties, as yet unIntroduced, were sent to by hybridizers from Massachusetts, New Jersey, New York, Tennessee, Utah, California and Pennsylvania.

Visitors to our gardens last year showed keen interest in this display of new creations on test so we are continuing it again this season. The two year old clumps should put on an even better display this spring. New varieties which were sent to us last summer will lend added interest.

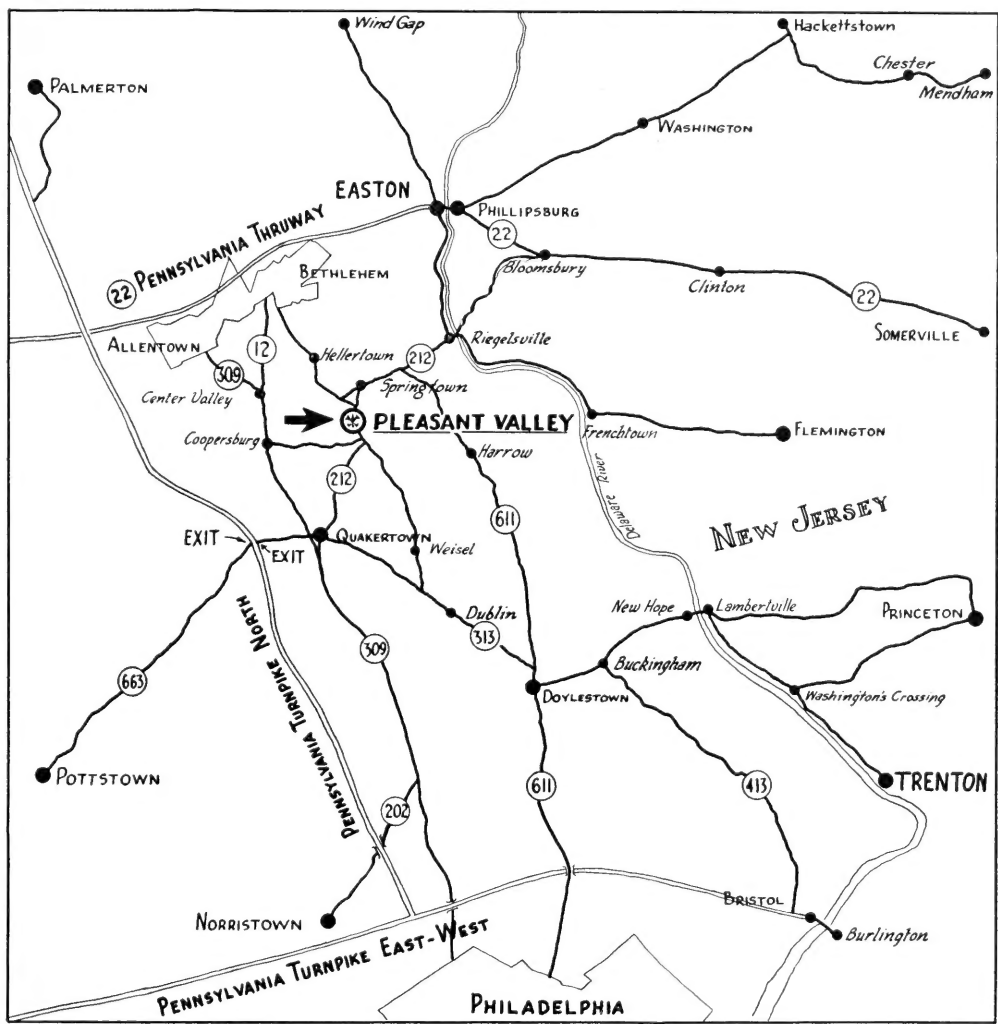

THE AMERICAN IRIS SOCIETY

Every Iris lover should by all means join the above organization, one of the finest of its kind in the country. Members receive four big Bulletins (illustrated) yearly, each of which are packed full of interesting and instructive articles on Iris. You also receive free the valuable new booklet "What Every Iris Grower Should Know."

Membership costs \$5.00 per year. Send money and application for membership to The American Iris Society, 2237 Tower Grove Blvd., St. Louis 10, Missouri, or you may include the above amount with your order and we will make application for you.
